further

Dear Captain Young,

I have been incarcerated at the Champaign Co. Jail for about $6\frac{1}{2}$ months.

During my stay a problem has arose of me passing blood in my urine tract. I have had 2 or more urine samples taken and I could actually view blood present within the specimen cup.

I was sent to the outside hospital on this matter and I was explained of my condition and the Doctor indicated my condition would progress. Note: at this time there was no blood in my urine, but since this time, the blood, in my urine has become very frequent and additional complications have arose since.

Although, I'm not one to make false claims or unjustified request, I feel that my medical request and treatment has been ignored and that I need additional attention

for my condition. II

I Respectfully request that you consider reviewing this matter of much importance to me. I also Thank you for any assistance that you may provide

Sincerely,

Gregg Duckworth
